

PRODUCT	DESCRIPTION	PRODUCT CODE	PRICE/5 L
Thinners	Colorless liquid used for thinning paints for steel automotive industry also known as laquor thinners	LMC	
2K Thinners	For special automotive paints especially 2k paints.		
Mineral Turpentine	Medium evaporating solvent widely used in oil based paints and for cleaning brushes		
Toluene	Is a clear, colorless liquid with a distinctive sweet smell used in industrial settings as a solvent. Toluene is also an ingredient in some consumer products such as paints, glues and nail polish removers		
Acetone	A colorless liquid also known as propanone, is a solvent used in manufacture of plastic and other industrial products		
NPA/IPA	Widely used as solvent for coatings, pharma applications, other industrial processes and in electronic industry and printing . Also finds medical/personal hygiene applications as rubbing alcohol, hand sanitizer, and disinecting pads typically contain a 60-70 solution of isopropyl alcohol in water, is also used as a water drying aid		
Ethyl Acetate	Is a high purity solvent, it is used in cleaning electric circuit boards and as nails polish remover. At a lower purity it can be used as in printing, pharmaceuticals, perfumes, food, decaffeination of tea/coffee and a carrier solvent for herbicides		
Methylated spirit	Is a suitable alternative to isopropyl Alcohol where solubility is not critical or can be assisted by other formula components		
Surgical spirit	It contains diethyl phthalate BP, castor oil and industrial methylated spirit BP. The spirit is applied to the surface of the skin for use as cleansing agent and it also has antiseptic properties		
Xylene	Appears as a colorless watery liquid with a sweet odor. Less dense than water. Insoluble in water. Irritating vapor		

Butyl oxitol	This colorless liquid has a sweet, ether like odor as it derives from the family of glycol ethers, it is used in many domestic and industrial products because of its properties as a surfactant.		
Solvent 45	A blend of aliphatic hydrocarbons, organic solvents and surfactants, formulated to remove graffiti from sealed surfaces, remove most permanent inks and paints from sealed or painted surfaces. It is also safe to use on desk tops, painted or powder coated metal, aluminium and some plastic surfaces (including poly carbonate)		
Solvent E5	Can be used in cleaning agent, medical disinfectant, cosmetics and specimen preservation		
Benzine	Is an aromatic hydrocarbon extracted from cracked gasoline, etc. It is used as a raw material for styrene, phenol, cyclohexane, and various other chemicals. It is also used as a solvent		
Roller wash	Can not be mixed with water, contains anti-corrosion so it is safe for metal parts, suitable for washing offset machines using UV offset inks		
Toilet cleaner	Is a powerful stain remover. It removes dirt, rust and slime from tiles, urinals grout and toilet bowls. This product kills bacteria and leaves a clean and fresh odor after application		
Dish washer	An all purpose dish washing formula with anti bacteria and intensified grease cutting power for faster and more efficient removal of grease, fats and oils in dishes, pots and other kitchen utensils		
Multi-purpose cleaner	It is designed to be used on many different surfaces and for a variety of cleaning tasks around the house. There is no standard set of ingredients for the cleaner, but they can typically act as disinfectant, detergent, degreaser and solvent		
Hard surface cleaner	Are substances (usually liquids, powders, sprays or granules) used to remove dirt including dust, stains, bad smells, and clutter on surfaces		
Degreaser	Are chemical substances that dissolve water insoluble substances (greases, dirt and oils) from hard surfaces. They are generally used as a degreasing agent for removing substances from machines, floors, tools and hard surfaces		

Glycerine	Is a colorless, odorless, viscous liquid that is sweet tasting and mostly non-toxic. It is widely used in the food industry as a sweetener and humectant and in pharmaceutical formulations		
Sanitizer	Is an alcohol gel with a mild, pleasant non-residual ingredient for fast, effective and safe cleansing without the use of water or towels. It leaves hands feeling refreshed without a sticky residue and do not dry hands as much as soaps.		
Tile Cleaner	Is a slightly acidic, water based cleaner for deep cleaning of different surfaces. The special formula allows the product to penetrate inside the pores and texture deep down		
Engine cleaner	Substances designed to remove oils and grease from your motor. These tough to clean materials are difficult to remove and require the use of something heavy duty..... grease, dirt, and oil cause the engine to run less efficiently		
Battery Acid	Is sulphuric acid that has been diluted with water to attain a 37% concentration level		
Toilet Dip	Toilet dip is a highly concentrated disinfectant containing a powerful aromatic hydrocarbon as well as perfumes that do not only cover up bad odours		
Termite poison	A suspension concentrate insecticide for the control of ants and the protection of building against subterranean wood destroying termites.		
Truck wash	Is a concentrated vehicle detergent for breaking down and removing road dirt, mud, oil films, exhaust soot and insect residues from trucks, cars, 4 WD's, caravans, boats, motorbikes, trains and trams		
Sodium Hypochloride	Is a compound that can be effectively used for water purification. It is used on a large scale for surface purification, bleaching, odor removal and water disinfection		
Floor wash	It breaks down dirt, food, grease and grime with		

	its plant based formula. It contains natural plant extracts and essential botanicals that leaves floors feeling clean and residue free.		
Hand Cleaner	A luxurious hand lotion thats ready for dispenser use. Just a few drops you a rich creamy lather that quickly removes grease, grime and soil, leaving hands clean, smooth, conditioned and smelling fresh. It is fluid enough to be pumbed through most available dispensing equipment
